

March 29, 2016

Dear Colleague:

We are writing you today to thank you for your past support of the Oklahoma Renewable Energy Council (OREC) and our efforts to promote renewable energy and energy efficiency in our state, and to ask for your continued support through a membership with our organization for 2016. Just this January, OREC held a joint conference which covered a full range of renewable energy and energy efficiency technologies topics, with industry expert speakers from all over the country—we hope to continue activities like these in 2016, with your support.

In this time of rapidly advancing technology, it is critical to keep abreast of quickly evolving trends in the renewable energy and energy efficiency industries. OREC is the place Oklahomans from across these industries can find and network with industry experts to keep abreast of these advances. OREC has been evaluating how it can better assist its members, and is re-dedicating its commitment to have informative and educational speakers at each of its meetings. Additionally, OREC is working to ensure it covers all types of renewable energy, regardless of the current industry size. The areas of renewables we will focus on include solar, wind, a broad range of biomass, and geothermal, as well as a wide range of energy efficiency technologies such as enhanced low energy consumption lighting. In this time of rapidly changing conditions, OREC's future looks very bright.

For OREC to provide this enhanced type of quality services to you, we need your financial support through a paid membership with our organization. OREC is kicking off its 2016 membership and our strength is our members. OREC offers a variety of membership levels that allow our members to support the organization and its mission financially, and to allow us additional capacity to increase our organization's visibility and offerings for our stakeholders.

With financial support from you, OREC will be able to do a great deal more to support and create a network for the renewable energy industry in our state, as well as to increase our educational and outreach activities that promote the consideration and inclusion of renewable energy as a strong part of our state's energy mix to all Oklahomans. OREC feels that the membership levels outlined in the attached application provide tangible, high-value benefits to any organization, and we ask for your support. Please note that there will always be an option to remain a general member of OREC at no cost.

Please continue your support of OREC with a paid membership. You may send any questions you may have to orec2006@gmail.com, and membership applications and dues can be mailed to the OREC P.O. Box listed on the membership application and at the bottom of this letter.

Thank you in advance for your support of the Oklahoma Renewable Energy Council!

Sincerely,

The Oklahoma Renewable Energy Council Board
